

Ultimate Supplies, LLC - ElectraFlex High Speed Curtain Door System

ElectraFlex High Speed Curtain Door System.

This door system is designed for the car wash, lube and commercial industry when speed, reliability, and corrosion resistant materials are recommended. The ElectraFlex is operated by our exclusive **EM1 Model** electric operators and Controls.

Available Size:

Each door system is custom manufactured to fit the desired application. Available door sizes ranging from 8' to 12' wide and 8' to 12' tall openings. Precise measurements of the openings are required for each door.

Vinyl Details:

A variety of colors are available in vinyl with standard 3 clear vinyl sections in each door. All vinyl doors are made of 18 ounce per square yard heavy duty, puncture resistant & UV protected material. All clear vinyl is .080 Gauge. Vinyl curtains are 2" narrower than the actual door opening.

Side Rails:

Side Rails are made of ¼" Thick UV Stabilized PVC and feature our exclusive *aluminum reinforced* reset. All channels include ½" brush with stainless steel setting. Reset feature automatically realigns curtain into the track in the event that the curtain is forced out by vehicle or strong wind.

Mounting & Bracket:

Mounting brackets fabricated of stainless steel with custom stainless steel bearings. Shaft is 1" diameter & ¼" keyway. Mounting tube is 4" OD Stainless Steel.

Counterbalance:

No counterbalance required on ElectraFlex High Speed Curtain Door System featuring EM1 Electric Operator.
